ASTRAL ARCANA

Each kingdom gives special quests, if succeeded the kingdom gives rewards such as a shop discount and skill points you can spend on the skill tree, each region only gives points for one category.
The game will be divided in two parts which can be independent or not which are fights and ressource collects. Each of these parts will be represented by a branch with another branch for the utilities perks in the skill tree and they will have two sub-branch with their own type of skill points to unlock and improve perks of them. A link between combat/farming and utility branches will exist but only with a single side, combat/farming toward utility. (It will allow players to skip some parts of utilities perks to unlock first utilities related to combat/farming).

In the combat part, there will exist some classes which will be used for fighting, they are divided into mages [ranged], archers [ranged], assassins [melee], bruisers/berserker [melee], tanks [support] and enchanter [support].

mettre tout en variable (Nom du roi, dernier couronnement…)

SKILL TREE MAIN BRANCHES

CONTINENTS AND KINGDOMS
